

K-Ergo Swift Return Idler Frame

K-Ergo Swift Return Idler Frame makes roller change outs quick and seamless, with access to only one side of the conveyor required.

The ingenious flip down design eliminates the need for belt jacks as the belt does not need to be raised out of the way to lower the frame.

K-Ergo Swift Return Idler Frame's sturdy locking mechanism can be fully disengaged from one side of the frame.

Key features & benefits:

- Fully galvanised frame.
- Allows for single side access and roller changeout.
- Provides safer and quicker manual handling.
- Custom flat return, vee return and trough side designs also available upon request, contact Kinder.

K-Ergo Swift Return Idler Frame
